WHY INDIA?

There was significant US export growth in 2022, up 18%. Great Lakes states saw a greater increase at 26%.

Top export sectors include aviation and defense, education, environmental technology, energy, healthcare and medical equipment, information technology, chemicals, food and agriculture, safety and security, and travel and tourism.

India has a very large domestic market (population of 1.4 billion), with more than half of the population younger than 25 years old. There is an emerging middle class with the ability to purchase US goods and services.

India's GDP grew 7.3% in 2022, and is forecast to grow 6% in both 2023 and 2024.

India is a face-to-face society, and in-person meetings are typically necessary before formalizing business partnerships.
